OBJECTIVE

To obtain a full-time position as a software developer involving problem solving and creative thinking.

EDUCATION

B.S. Computer Science, minor in **Mathematics**

May 2011

Wheaton College, Wheaton, IL

- Cumulative GPA: 3.95/4.00, Dean's List, Summa Cum Laude

EXPERIENCE

Freelance Livestream Producer

September 2012 - Present

- Produced high-quality online broadcasts of video game competitions through Twitch.tv with more than 35,000 concurrent viewers
- Leveraged innovative use of streaming technology to incorporate multiple in-game perspectives from across the globe into a single production
- Consistently and successfully executed multiple simultaneous production tasks while on the air, including audio, graphics, and vision mixing

Software Developer

July 2011 – April 2014

Logos Bible Software, Bellingham, WA

- Developed and maintained over 40 IIS web services with C# .NET MVC 3 and MSSQL for syncing user data between desktop & mobile platforms
- Implemented sync clients on desktop and Android apps to interact with RESTful sync servers
- Created backend system for storing and retrieving arbitrary files in a web-based file management application using MySQL and Amazon S3

Computer Support Technician

August 2007 – May 2011

Wheaton College, Wheaton, IL

- Interacted with employees and students to help solve a wide variety of computer and IT problems
- Configured and deployed over 140 computers into a new classroom building as part of a large-scale upgrade, including Linux and Windows workstations
- Implemented a new user interface for a web-based computer registration system used by 2,400 students annually
- Created a student directory search web application utilizing MySQL, PHP (Yii), and jQuery

Web Development Supervisor

August 2005 – August 2007

Teen Mania Ministries, Lindale, TX

- Responsible for creating and maintaining several internal and external web-based applications, including Oracle databases and MS CRM systems
- Executed successful migration of five full-scale web sites to new server providers
- Constructed a MSSQL-driven employee self-evaluation web application used weekly by 500 employees
- Trained, supervised, and managed a team of three interns

Web Developer

May 2005 – August 2005

North Cobb Christian School, Kennesaw, GA

- Authored custom content management system for new school web site
- Developed aptitude for self-motivation and self-learning of new technologies

ADDITIONAL ABILITIES

- Languages: C#, Java, PHP, SMLnj, C, ColdFusion 6, HTML/JavaScript/CSS
- Tools: Visual Studio, MSSQL/MySQL, Eclipse, Dreamweaver, CVS, SVN, Hg
- Operating Systems: Windows XP/Vista/7/8, Mac OS X, Linux/BSD
